

High Light Series Answers Consumer Demands for Energy Efficient LEDs

Madera, California - March 10, 2009 - TEKA Illumination has released the new High Light Series luminaires, now available with BKSSL™ Technology and other exclusive options.

We combined the timeless beauty of copper, brass, and stainless steel materials along with our exclusive BKSSL™ technology to create a classically styled family of functional, energy efficient, sustainable pathlights and wall sconces to give birth to The **High Light Series** from Teka Illumination.

(Left to right) Bali, Moor, and Safari shade selections.

In addition to our company website, we are introducing High Lights on their own dedicated product website at www.highlightseries.com. This fully interactive site is online right now.

The **High Light Series** features both wall and pathlight luminaires in four distinctive styles, Classic, Bali, Moor and Safari for use in interior and/or exterior applications.

The **High Light Path** (HLP) is specially designed for mounting high above mature plantings. Only a soft glow ring from the acrylic lens is visible above 90°. The lens is factory sealed to a pure copper shade, which is then secured by stainless steel hardware to a solid brass machined base. Copper stems integrate with brass connectors for a timeless look. These enduring metals are naturally corrosion resistant and will weather over time, achieving a breathtaking natural patina. Factory applied finishes are also available.

High Light Wall, Classic shade, with a polished finish.

The **High Light Wall** (HLW) is a wall-mounted version of our popular 4" diameter pathlight, featuring a distinctive sconce design with a diffuse accent ring. Heavy copper integrates with solid brass connectors and a 5" diameter copper canopy that mounts to a 4" octagonal junction box.

In addition to low voltage Xelogen, High Lights feature BKSSL™ technology to delivery high efficacy, long life, and low energy lighting solutions. Our exclusive, 1.1 watt, side emitting, solid state source with a 360° distribution and integral driver is only available in products equipped with BKSSL™ technology. For more details visit our dedicated website at www.highlightseries.com.

Over the years, natural TEKA luminaires will patina and change in the environment. With our new **Clear Coat Protection**, it is possible to retain the natural beauty of freshly blasted raw copper, brass and bronze. The clear coating process allows the lustrous and vibrant characteristics of these enduring metals to last indefinitely. Retaining a timeless beauty of TEKA luminaires is now a viable option with clear coating.

Expanded mounting accessories for the pathlight luminaires are clearly outlined in the new **High Light Series** catalog. In addition to standard TEKA mounting options, we are offering B-K Lighting accessories such as **Power Pipe™** with an integral transformer. Remote and Integral Transformer Housing options such as **Universal Power Module™** and **Power Pipe™** and TR transformers to complete the design process.

About TEKA Illumination: Since 1993, TEKA Illumination has been driven to manufacture sustainable luminaires. All TEKA Illumination products are manufactured from copper, brass and bronze, three of the oldest natural and manmade materials. These materials are extremely resistant to environmental corrosion and physical abuse attributing to their sustainability.

Enduring metals. Elemental designs. New technologies. These are the inspirations of TEKA Illumination.

About B-K Lighting: Since 1984, B-K Lighting has been dedicated to providing the lighting industry with the highest quality, most innovative and fairly priced outdoor lighting fixtures.

B-K Lighting manufactures standard and custom fixtures for outdoor and landscape lighting including path, sign, area, flood, recessed building mounted and in-grade applications. B-K Lighting products are installed in high-end residential and landmark applications around the world.

QUALITY, SERVICE, INNOVATION, and VALUE all add up to make B-K Lighting the number one choice in outdoor lighting.

B-K Lighting and TEKA Illumination have a long history of supporting green manufacturing. As members of the USGBC (United States Green Building Council) and IDSA (International Dark Sky Association), they have led their industry in providing earth-friendly designs and manufacturing concepts.
